👤 About me

I'm a Software and Data Engineer with 5+ years of experience delivering data-driven and software development solutions across diverse industries. My expertise spans designing and implementing big data pipelines, managing ETL processes, and building statistical/ machine learning models that solve complex business challenges. On the software side, I'm also experienced in Python, JavaScript, TypeScript, and backend web development-leveraging frameworks to build scalable applications and microservices.

📁 Work Experience

Data Engineer, State Oil Company of the Republic of Azerbaijan (SOCAR)

12/2024 – Present | Baku, Azerbaijan

- Orchestrate Airflow on Kubernetes; design Spark/dbt ELT executed via Trino.
- Operate MinIO data lakehouse and PostgreSQL; tune storage and query performance.
- Build APIs with Flask/FastAPI and internal tools in TypeScript/React, shipped via CI/CD.

Freelance Data & Full-Stack Engineer — Various Clients, Selected projects: pergolade.com, glassgroup.com, mezelabs.org

01/2022 – Present | Remote

- Built end-to-end apps with React + TypeScript, including 3D UIs via Three.js/React Three Fiber.
- Designed microservices and APIs using Flask, Django, and FastAPI.
- Automated workflows integrating HubSpot, CompanyCam, and PlanHub (webhooks, data sync, quote pipelines).
- Architected Google Cloud environments: Cloud Run services, Scheduler jobs, Cloud Storage buckets, and Cloud SQL (Postgres) databases with secure IAM and monitoring.

Senior Data Analytics and Engineering, Azercell Telecom LLC

06/2022 – 12/2024 | Baku, Azerbaijan

- Developed data-driven applications with Python Streamlit and Django, enabling interactive analytics and operational dashboards.
- Designed and optimized ETL pipelines and reporting solutions over Oracle databases, improving query efficiency and reliability.
- Delivered self-service BI tools and automated workflows that supported faster decision-making across business units.

Data Engineer, eManat

07/2021 – 06/2022

- Built and scheduled ETL pipelines in Python to ingest, clean, and validate transaction data.
- Designed and optimized schemas, queries, and stored procedures in MS SQL Server (MSSQL) and PostgreSQL for reporting and analytics.

Projects

pergolade.com — 3D Configurator & Automation 

- React + TypeScript **3D configurator** (Three.js/R3F) with pricing/PDF APIs.
- **HubSpot/CompanyCam/PlanHub** automations; **GCP**: Cloud Run/SQL/Storage/Scheduler.

glassgroup.com — Marketing & Lead Funnel 

- React + TypeScript / Shopify pages, SEO and analytics.
- HubSpot forms + UTM routing; Django/FastAPI backend.

mezelabs.org — Super Admin & Services 

- React + TypeScript super-admin for POS/ops.
- Flask/FastAPI microservices on GCP (Run/SQL/Storage/Scheduler).

- Developed data services and internal tools in C#/.NET, integrating operational systems with BI and batch workflows.

Education

Doctor of Philosophy - PhD, Artificial Intelligence, Università degli Studi della Tuscia
02/2023 – 10/2026

Master's degree, Administration, Dokuz Eylül Üniversitesi
09/2018 – 09/2021

Master's degree, Bussiness Administration, Hochschule für Wirtschaft und Gesellschaft Ludwigshafen
09/2019 – 02/2020

Bachelor's degree, Administration, The Academy of Public Administration under the President of the Republic of Azerbaijan
09/2014 – 07/2018

Skills

Programming — Python, TypeScript/JavaScript, SQL, C#, Bash, WebGL, Git

Data Engineering — Apache Airflow, Apache Spark, dbt, Trino, ETL/ELT, Data Modeling (star/snowflake), Incremental loads, Partitioning

Storage & Databases — PostgreSQL, MS SQL Server (MSSQL), Oracle, MinIO (S3), Apache Iceberg

Web & APIs — Flask, FastAPI, Django, Streamlit, REST APIs, Webhooks, OAuth2

Frontend — React, TypeScript, Three.js, React Three Fiber

Cloud & DevOps — Google Cloud, Docker, Kubernetes, CI/CD

Observability — Prometheus, Grafana, Logging/Alerting best practices

Integrations & Automation — HubSpot, CompanyCam, PlanHub (webhooks, data sync, quote workflows)
